U S Virgin Islands sizing solar panels and batteries

Overview

The USVI Solar+ Financing (SPF) Pilot Program is a loan program for residential solar PV and Battery systems being offered through the Virgin Islands Energy Office and the VI Water and Power Authority.

The USVI Solar+ Financing (SPF) Pilot Program is a loan program for residential solar PV and Battery systems being offered through the Virgin Islands Energy Office and the VI Water and Power Authority.

V.I. Energy Office taking applications this week for low-interest loans so homeowners can install solar power and battery storage systems. U.S. VIRGIN ISLANDS — As part of his commitment to transitioning the U.S. Virgin Islands to renewable energy sources, Governor Albert Bryan Jr. and the Virgin Islands Energy Office (VIEO) will begin taking .

Honeywell Process Solutions has announced plans to install about 124 MWh of its battery energy storage systems alongside 140 MW of solar at six sites to help the US Virgin Islands cover.

The adjoining solar facilities will provide a total of 140 MW solar capacity. The solar-plus-storage system is expected to fulfill 30% of the islands' energy consumption needs. According to the Department of Energy (DOE), the U.S. Virgin Islands have heavily relied on fossil fuels to generate electricity in the past.

Affordable Home Solar Panels & Solar Battery Backup for U.S. Virgin Islands Homeowners. Learn more about our 25-year system protection costs, promotions & savings. What is the USVI solar+ financing pilot program?

The USVI Solar+ Financing (SPF) Pilot Program is a loan program for residential solar PV and Battery systems being offered through the Virgin Islands Energy Office and the VI Water and Power Authority. Through on-bill repayment this program allows property owners to pay for renewable energy systems through their monthly utility bill.

What is the cost of electricity in the USVI?

The electricity rates in the USVI are \$0.47 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

Why is solar power important in the USVI?

The USVI's abundant solar resource, with a global horizontal irradiation of nearly 6 kWh/square meter-day, makes solar power economically attractive in the USVI.

Do St Thomas and St Croix have electricity?

As of late 2014, both St. Thomas and St. John were served by one electrical grid run by the Virgin Island Water and Power Authority (WAPA). St. Croix, however, has a separate electrical grid in the WAPA service area. More than 1,000 distributed renewable energy systems were connected to the WAPA grid.

How does oil affect the cost of electricity in the USVI?

The USVI, like many island nations, is heavily reliant on fossil fuels for electricity generation. This reliance leaves the USVI vulnerable to global oil price fluctuations, which directly impact the cost of electricity. Assumes an average electricity price of \$0.50/kWh and consumption of 767.4 gigawatt-hours (GWh).

How many solar water heating and PV systems are there?

Approximately 1,500 solar water heating and PV systems have been installed throughout the territory since February 2010. Currently, 15 MW of distributed solar PV are either in place or under construction.
