U-shaped steel photovoltaic bracket installation

Overview

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do I mount solar on a metal roof?

There are many options when mounting solar on a metal roof, the details of which can impact installation costs and lifetime performance. Metal rooftop mounting consists of two basic parts: the roof mounting hardware and the actual solar panel attachment interface.

Does pvmars install solar panels on a tin roof?

PVMars is a solar energy equipment supplier, and has installed 1MW of grid-connected solar systems for hospitals in Malaysia. Those solar panels are all installed on the tin roof. For more information about this case, click on the orange font. Metal roofs are uneven, so clamps are needed to fix guide rails.

What ancillaries can I attach to my PV array?

From service walkways to conduit, wire trays, optimizers, other MLPEs and monitoring equipment, you can use S-5! clamps, brackets and GRIPPERFIX[®] universal utility mounting system to securely attach the above ancillaries to your PV array.
