Who are Verkor batteries?

Batteries. Now. For the future. Verkor was founded in 2020 with the sole ambition of fast-tracking low-carbon battery production in France, to serve the European market. With a team of international experts in the battery sector, Verkor strives for manufacturing excellence by optimising proven technology.

Why did Verkor join the Next 40 program?

This announcement rewards Verkor and recognizes its importance in the development of the electric battery sector, which is essential for French and European sovereignty and competitiveness. Verkor, a European pioneer in low-carbon batteries designed for electric vehicles, is among the 2023 class of the Next 40 program.

Is Verkor the Next 40?

Verkor, a European pioneer in low-carbon batteries designed for electric vehicles, is among the 2023 class of the Next 40 program. The latter offers support designed for French scale-ups capable of becoming world-class technological leaders. This announcement rewards a very rich year for Verkor and marks an important milestone in its development.

Where will Verkor batteries be made?

performance, low-carbon batteries will be produced in the future Verkor Gigafactory in Dunkirk, France. Verkor batteries will be used in the upper segment vehicles of the Renault Group brands, starting from

Will Verkor supply batteries for electric vehicles?

Verkor has entered a long-term commercial partnership for the supply of batteries for electric vehicles. Verkor will supply Renault Group with the equivalent of 12 GWh of batteries each year. These batteries will be used in the upper segments of Renault Group's brands.

How much did Verkor secure for a Gigafactory in Dunkirk?

This time it's Verkor, the Renault-backed French battery builder, which said on Thursday that it secured "more than €2 billion" — roughly \$2.1 billion USD — to speed up construction of its Dunkirk gigafactory. Verkor produces pouch and cylindrical battery modules for electric vehicles and energy-storage sites.

## Battery recycling: a beacon for change

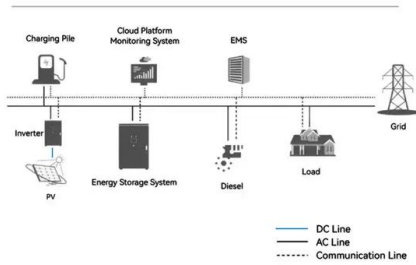

These four challenges are very much embedded in the current reality. Lockdowns and restrictions are facing us with the reality of our consumer habits, compelling us to pick up the pace of the energy transition and reshore industry. The battery, especially if governed by a strict legislative framework, can serve as a beacon to light the way forward.

## French gigafactory firm Verkor and Nidec in 10GWh BESS deal

Verkor, a company building a lithium-ion gigafactory in France, and system integrator Nidec ASI will together produce up to 10GWh of battery energy storage systems (BESS) to 2030. Under the non-binding agreement, Verkor will

**System Topology**

develop, manufacture and supply battery cells and modules, while Nidec ASI will develop the battery management systems

**Everything you need to know about high-power battery cells**

Verkor covers all kinds of applications: from privately-owned vehicles (our focus) to commercial vehicles and stationary energy systems, by delivering high-power, low-carbon and durable batteries. Verkor develops large pouch and cylindrical cells to address the needs of car and equipment manufacturers, and power utilities.

**Verkor secures more than EUR2 billion to launch high ...**

Verkor, a future European leader in the production of low-carbon batteries, applies its expertise. This new FSP investment in Verkor furthers our ambition of laying the foundations for a New Industry in

**Renault Group and Verkor: a long-term commercial ...**

o Renault Group and Verkor have entered a long-term partnership to supply 12 GWh per year of batteries for electric vehicles. o These high-performance, low-carbon batteries will be produced in the future Verkor
