**Solar Systems in Cayman**

Cayman's goal of obtaining 70% of its power from renewable resources by 2037 has raised discussion for alternative ways of doing this. While solar power remains a trusted option for renewable energy, with rising fuel prices and increasing air conditioning costs, interest in geothermal energy cooling systems is also on the rise.

Energy Policy (NEP) sets a target of achieving 100% renewable energy by 2050.

## Dart Enterprises: Integrating Renewable Energy and Sustainable ...

The company has installed 21 solar arrays across its business portfolio, contributing to 11% of the total solar energy production in the Cayman Islands. This initiative reduces the reliance on fossil fuels and supports the island's efforts to diversify its energy sources and enhance energy security. In addition to solar power, Dart has
