## Overview

Are wall-mounted solar panels a good addition?

Wall-mounted solar panels are a great addition if you're thinking you might want a home solar installation or commercial solar installation if you're looking to make the switch to solar power but don't want to penetrate your roof or use vacant yard space.

What is a photovoltaic solar panel?

Photovoltaics, more commonly known as solar panels, are one of the purest and most reliable methods for producing renewable energy. Each panel is composed of photovoltaic cells, which activate when exposed to the sun, absorbing its rays and converting them into clean electricity.

What is the installation process for wall-mounted solar panels?

The installation process for wall-mounted solar panels involves several steps that need to be carefully followed to ensure safety and efficiency: **Site Inspection:** A professional installer examines the wall for structural integrity and sun exposure, confirming compatibility with solar panel installation.

How do I choose a wall-mounted solar panel?

When considering wall-mounted solar panels, it's essential to evaluate several factors to ensure your home is suitable for such an installation. Start by examining the solar potential of the walls on your property. A south-facing wall is preferable in the Northern Hemisphere as it receives the most sunlight throughout the day.

How do wall-mounted solar panels work?

Because wall-mounted solar panels are vertical or have high slopes even if tilted, their energy absorption is most successful when the sun is lowest in the sky. You'll want to place your wall-mounted systems strategically in order to maximize energy absorption.

Do wall-mounted solar panels need special mounting hardware?

Wall-mounted solar panel systems require special mounting hardware to install vertically. Staging is often necessary since there are more safety considerations than with roof or ground-mounted solar panels. It's reasonable to assume that higher installation costs will follow when special hardware is necessary for a project.
