# Welding method of photovoltaic bracket on roof

## Overview

---

Install a mounting system for solar thermal or solar photovoltaic panels. Consider the roof type (material and slope), weatherproofing, installation convenience, and wind and snow loadings. Choose an appropriate racking and mounting system for the type of PV module, and install the system along with needed flashing and seals.

The invention relates to a novel mounting mode of a photovoltaic bracket of a color steel roof, which comprises the following steps: firstly, welding an I-shaped steel beam at the lower.

The Sika SolaRoof® System is a groundbreaking solar solution that combines the proven performance of Sarnafil and Sikaplan PVC roof assemblies with the industry's most innovative PV racking system to bring Sika customers the only FM-approved and insured solar roof system.

PV brackets can be divided into three types: fixed, tilt-adjustable, and auto-tracking type, and its connection method generally has two forms of welding and assembly. Among them, fixed-type bracket includes roof-type bracket, ground type bracket, and water type bracket.

The IronRidge Seismic Anchor uses the EcoFasten Eco44R to attach to the roof structure and our customer bracket to securely attach to the Ballast Tray. Both the Seismic Anchor and Ballast Tray contain slots to accommodate for placement variances, up to +/- 4 inches of travel in every direction.
