Tilt angle, also known as an elevation angle, is simply the angle between the panel and the racking or roof it's attached.

Tilt angle, also known as an elevation angle, is simply the angle between the panel and the racking or roof it's attached.

The angle of your solar panels refers to their vertical tilt. Ideally, your panels should be perpendicular to the sun's rays during peak sunlight hours—or as close to that as possible.

A simple rule of thumb is that the ideal tilt angle for solar panels is equal to your latitude.

What is the Best Angle For Solar Panels?

In the northern hemisphere the solar panel should be installed at an angle that faces true south. For the southern hemisphere the angle has to be true north.
