What replaces solar panels

Overview

We'll break down the top alternatives to rooftop solar panels – community solar, ground-mounted solar, solar sheds, and solar shingles.

We'll break down the top alternatives to rooftop solar panels – community solar, ground-mounted solar, solar sheds, and solar shingles.

Whether you're looking to replace your roof and add solar panels or go through a roof replacement with solar panels already installed, read our guide for more.

Replacing your old solar panels with new solar panels. Today's solar panels generate about 25% more electricity from the same roof space as equipment from just 5 years ago, and even more compared to decade-old panels. Sometimes, replacing your old equipment can yield the biggest payoffs.

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage.

First of all, don't worry — you can replace your roof if you already have solar panels. You'll just need to remove your panels, then reinstall them on your new roof. Removing the panels will take about a day, and replacing them may take another day, adding two days to your overall roof replacement project. Should you replace old solar panels?

Replacing your old solar panels with new solar panels. Today's solar panels generate about 25% more electricity from the same roof space as equipment from just 5 years ago, and even more compared to decade-old panels. Sometimes, replacing your old equipment can yield the biggest payoffs. How can replacing old solar make any sense?

.

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

Should you choose solar during a roof replacement?

That isn't the only way you'll save by choosing solar during a roof replacement. Solar panels last about 25-30 years, which is similar to the lifetime of a roof. By doing both at the same time, you avoid needing to have your solar panels re-installed after replacing your roof, which can save money in the long-run.

Can you put solar panels on a old roof?

If your roof is old, the answer is no—at least not until you replace it. Asphalt shingles that are 10 years old or more should be replaced before adding a solar array on top, says Ana Almerini, a spokesperson for SolarReviews. New solar panels are warrantied to last, on average, 25 years, while most roofs are warrantied for 30 years or less.

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

Can roof replacement & solar panel installation be a smart move?

We will delve into how the convergence of roof replacement and solar panel installation can be an intelligent move toward a more sustainable and energy-efficient home. Cost efficiency: Replacing a roof and installing solar panels simultaneously can be more cost-effective in the long run.

What replaces solar panels
