What to do if you don't want to use photovoltaic panels anymore

Overview

If you can't install solar panels anywhere on your property, don't own your home, or you simply don't want solar panels on your roof, community solar is a way to support solar energy without installing anything on your property. Community solar farms are large-scale solar arrays that support the local utility grid.

If you can't install solar panels anywhere on your property, don't own your home, or you simply don't want solar panels on your roof, community solar is a way to support solar energy without installing anything on your property. Community solar farms are large-scale solar arrays that support the local utility grid.

If you're wondering what the alternatives to solar panels are, you've come to the right place. We'll give you ten great options that won't break the bank and will help keep your home as environmentally friendly as possible.

DIY portable solar panels. If you don't need to power your whole home, but prefer to use solar power as a back-up system during emergencies, a portable solar panel with a generator can work.

Solar panels produce energy that homes can use instead of the electricity from the grid, reducing electricity bills. If you pay less than \$75 per month for electricity, installing solar panels probably isn't worth it for you. There are many reasons you might have a small electric bill: You have a small house.

Before you install solar panels on your roof, find answers to these 8 questions to make sure solar will save you money and energy. Can you collect electricity without putting solar panels on your roof?

Yes, it's possible to collect electricity from the sun without putting solar panels on your roof. If you want to take advantage of solar energy but you can't (or don't want to) put solar panels on your roof, you do have other options.

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.

Can you install solar panels without putting them on your roof?

Still, a portable solar panel can be convenient for short-term use. Solar panels can be installed as siding, sculptures, window glass, awnings, and even on the ground. Here's where you can install solar panels without putting them on your roof.

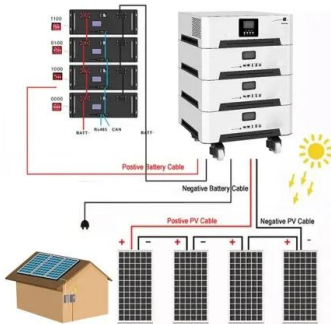

What are the best alternatives to rooftop solar panels?

We'll break down the top alternatives to rooftop solar panels - community solar, ground-mounted solar, solar sheds, and solar shingles. Community solar is one of the best ways to enjoy the benefits of solar without putting solar equipment on your property, and it's an especially good option for renters.

Should you install solar panels before buying a home?

The age and condition of your roof also matter. If your roof needs repairs or replacement soon, it's best to address that before installing solar panels. Solar panels are an attractive feature to buyers and typically increase a home's value. That means you may be able to recoup some of your installation costs if you need to sell in the future.
