When will photovoltaic panels pay off

48V 100Ah

Overview

According to most sites and calculators, the average U.S. homeowner can expect to pay off their solar panel system and get a return on their investment within 6-12 years.

According to most sites and calculators, the average U.S. homeowner can expect to pay off their solar panel system and get a return on their investment within 6-12 years.

A typical payback period for residential solar is 7-10 years, although it varies depending on your utility rates, incentives, system size, and other factors.

This time frame, known as the solar panel payback period, averages between six and 10 years for most residential solar installations.

Most homeowners in the United States can expect their solar panels to pay for themselves in between 9 and 12 years, depending on the state they live in.

"Most systems pay themselves off in about 10 years. Then you have decades of free electricity after that," Michaud explained.
