Looking to buy solar panels for your home and wave goodbye to high electricity bills and inconvenient power outages?

We've curated a selection of industry-leading solar panels and made sure that you also get all the components needed for a successful solar system installation.

Generate your own clean energy whenever the sun is shining with Tesla solar panels. Tesla uses solar panels that offer a sleek and modern take on traditional panels. With our proprietary mounting hardware, panels can be installed close to your roof without the need for rails, so they blend in with your roofline.

Our ground mount solar power kits can be installed yourself or by a licensed contractor. Each kit comes complete with tier-1 solar panels, grid tie inverters, and ground-mounting hardware. Choose our permit service to have detailed engineering plans and permit documents drawn up for you.

A Solar Kit includes every component to get the job done. New, UL test certified solar panels. Grid-connected inverter, optimizers, or micro-inverters. Mounting system for roof or ground. Options for installation and off-grid storage battery. Up to 30 year solar panel warranty. What should I look for when buying solar panels?

When shopping for solar panels, it's critical that you consider size, type, efficiency, wattage, cost, and warranty. We simplify the process by breaking down what you need to know and look for. Solar panels are available in various sizes.

Are solar panels sold separately?

*Solar panels are not sold separately. Grid tie inverters convert solar DC power to home-friendly AC power and provide net metering capability. Batteries optimize cost savings by storing surplus energy when rates are lowest and utilizing it during peak demand times. They also serve as a reliable backup power source during outages.

Does gogreensolar install ground-mount solar?

GoGreenSolar has decades of experience planning, designing and installing ground-mount solar. We go the extra mile for our customers, using USGS remote surveying technology to assess your site conditions and determine if ground-mount solar is a fit. Our solar drafters can draw up the exact configurations of your solar system.
