Where is the photovoltaic inverter market

Overview

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean energy solutions, which.

Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023. These inverters are highly reliable with timely maintenance and flexible enough to be.

The Asia Pacific region dominated the market with the largest market share of 44.09% in 2023. China is the largest contributor to the rapid growth of this region's solar market and is also a major global competitor. A.

Based on end-use, the market is categorized into commercial, residential & industrial, and utilities segments. The utilities segment emerged as leading segment and accounted for a revenue share of 44.33% in 2023.

Concerns regarding excessive carbon emissions owing to usage of conventional fuels for transportation and power generation purposes have prompted countries globally to opt.

The PV inverter market size is valued at US\$ 15.28 billion by 2024, from US\$ 41.87 billion in 2031, at a CAGR of 15.5% during the forecast period. PV inverters are critical components in solar energy systems that convert the

direct current (DC) generated by photovoltaic (PV) panels into alternating current (AC) that can power homes and .

The PV inverter market size crossed USD 13.32 billion in 2023 and is projected to witness 7.7% CAGR from 2024 to 2032, driven by the rising demand for clean and sustainable energy on the account of the growing concerns regarding harmful GHG emissions.

The top 10 global solar photovoltaic (PV) inverter vendors accounted for 86% of market share in 2022, increasing by 4% year-over-year since 2021, according to latest analysis by Wood Mackenzie, a global insight business for renewables, energy and natural resources. What is the global PV inverter market share?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market, according to Wood Mackenzie's ' Global solar inverter and module-level power electronics market share 2024' report.

How big is the solar PV inverter market?

We're here to help answer any questions about our products and services. The solar PV inverter market reached USD 8.45 billion in 2023 & expected to grow at 5% CAGR between 2024 and 2032, to reach USD 13.13 billion by 2032.

Which region has the largest solar PV inverter market share?

Asia Pacific is expected to account for the largest solar PV inverter market share, driven by the growing demand for renewable energy and the need for energy independence. The region is home to many developing countries, including China and India, where there is considerable growth in solar photovoltaic (PV) installations.

How will the North America solar PV inverter market grow?

North America solar PV inverter market is also expected to grow at a fast pace

during the forecast period as the United States is a significant market for various types of PV inverters. The region's growth is further driven by favourable government incentives, increasing awareness of clean energy, and declining solar panel costs.

What is the growth of PV inverter market in Europe?

A growing number of solar installations in developing nations has also significantly contributed to growth of market in the region. Europe: The PV Inverter Market in Europe holds 10% share in the market and the presence of major players in the region. Figure 1. Global PV Inverter Market Share (%), By Region, 2024.

What is the market share of solar PV inverters in 2023?

According to the Solar Energy Industries Association (SEIA), prices for solar PV installations have fallen 43% over the last 10 years in California, U.S. Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023.
