Damage due to wind and flooding in states that have frequent hurricanes is typically not covered in standard home insurance policies. In the following 19 states along the coasts of the United States, Wind Insurance (sometimes.

That's good news because it means a regular homeowners policy usually has you covered, and you won't need to get special insurance just for your solar panels.

That's good news because it means a regular homeowners policy usually has you covered, and you won't need to get special insurance just for your solar panels.

Key Takeaways Most homeowners insurance policies include coverage for solar panels. Solar panel insurance helps protect against physical damage, theft, vandalism, breakdowns or malfunctions, and business interruptions. The cost of insurance for solar panels varies but is generally affordable compared to the investment in solar panels.

Separate solar panel insurance policies offer comprehensive coverage tailored to the unique risks and value of your system, while endorsements can be a cost-effective option to extend coverage with.

Depending on the type of solar panel system being installed, you may need supplemental insurance. The location of your solar panels plays a huge factor in how they are insured, as most dwelling coverage just includes your main house. What is solar panel insurance?

Solar panel insurance is a type of coverage that protects homeowners who have installed solar panels on their property. This coverage is typically included in most homeowners insurance policies, which means that no separate solar panel insurance is needed.

Do I need solar panel insurance?

You may need to pay a higher deductible for solar panel insurance than you do for your homeowners insurance. Solar panel insurance is not always required, but it is a good idea to have it in case your panels are damaged or stolen. If you are leasing your solar panels, the leasing company may provide insurance coverage.

What is a dedicated solar panel insurance policy?

A dedicated solar panel insurance policy is designed to provide comprehensive coverage for your solar panel system. It often offers more extensive protection than what is provided by homeowners insurance.

Are solar panels covered by a separate insurance policy?

Separate insurance policies for solar panels may offer additional benefits, such as coverage for loss of income due to system downtime or the costs associated with temporary replacement power. These added protections could provide financial security in unexpected disruptions to your solar panel system.

Does homeowners insurance cover roof-mounted solar panels?

If you have roof-mounted solar panels, your homeowners insurance may cover them if they are damaged by a covered peril, such as fire or theft. However, some insurers may not cover wind or hail damage to roof-mounted solar panels. It is important to check with your insurance provider to see what is covered under your specific plan.

Do solar panels need earthquake insurance?

Solar panels are highly resistant to earthquakes, but if you live near a fault

line in California then additional earthquake insurance may be necessary to protect your home solar panel system. The best way to determine if your solar is protected against any form of natural disaster is to talk to your insurance company about your specific plan.
