Who to contact for photovoltaic panel installation

Overview

Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Compare quotes from reputable solar installers in your area. Look for experienced professionals who can guide you through the process and ensure a seamless installation. How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

Do solar panels need a building permit?

Building permits: Local solar permits are specific to where you live; some states require a roof with three feet of clear space surrounding the solar panels, whereas others allow you to install panels across the entire surface of your roof. Your solar company should know the restrictions and requirements

of your state and handle this paperwork.

Where can I find information on going solar?

For more information on going solar, check out the resources available from the U.S. Department of Energy Solar Energy Technologies Office, including the Homeowner's Guide to Going Solar, which demystifies the installation process.

What questions should you ask a solar installer?

A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed. In fact, ask a lot of questions, including: What modules do they use and why?
