# Who will install the photovoltaic panels

## Overview

---

Professional technicians install the solar panels, typically taking one to three days. Local authorities inspect the system, and once approved, your solar panels are connected to the grid.

Professional technicians install the solar panels, typically taking one to three days. Local authorities inspect the system, and once approved, your solar panels are connected to the grid.

The best way to install solar is through a qualified professional who holds a certification to do so and works with high-quality solar panels.

Professional solar installation companies typically install solar panels. Can I install my own solar panels?

Although DIY options are available, hiring a professional solar company is best to ensure your panels are correctly and safely installed. Yes, it's possible to install your own solar panels. However, DIY installations require electrical skills and advanced knowledge of solar energy that most DIYers don't have.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.

Can solar panels be installed on a south-facing roof?

For homes in the Northern Hemisphere, a shade-free, south-facing roof with solar panels placed at a 30-degree tilt is ideal for production. This is not to say that having a roof that is partially shaded, or east- or west-facing, puts a solar PV system out of the question.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Is a rooftop solar installation right for You?

Most homeowners opt for a rooftop solar installation to maximize their exposure to daily sunlight. However, these installations require ample roof space and may not be suitable for everyone. Here's what to consider: Sun exposure: South-facing roofs receive the most sunlight in the Northern Hemisphere (and vice versa in the Southern Hemisphere).
