# Xiaoji Solar Power Generation

## Overview

---

When will China start a solar farm in Xinjiang?

The state-owned Power Construction Corp of China announced the commencement of operations on 3 June 2024. The solar farm in a desert region near Urumqi, the capital of Xinjiang, spread across 200,000 acres of land.

What is China Green Development Group's Midong solar project?

China Green Development Group has switched on the 3.5 GW Midong solar project in Urumqi, China's Xinjiang region. The project required an investment of CNY 15.45 billion (\$2.13 billion).

How many kilowatts does Xinjiang have?

As of the end of October, Xinjiang saw its total installed capacity for power connected to the grid reach 107 million kilowatts, among which 35.91 million kW were generated by clean energy, accounting for 33.7 percent of its total, the State Grid Xinjiang Electric Power Co said.

Is Xinjiang Uygur a wind farm?

A wind farm is seen in Hami, Xinjiang Uygur autonomous region, in February. [Photo by CAI ZENGLE/FOR CHINA DAILY] With an abundance of strong winds and long hours of sunlight, Northwest China's Xinjiang Uygur autonomous region has been gradually stepping up its clean energy installations, taking advantage of its abundant renewable energy resources.

How much green energy does Xinjiang have?

According to Wang, the base can generate about 2.1 billion kWh of electricity from green energy annually, nearly 4.5 percent of Shihezi's total electricity output in 2022, saving 650,000 tonnes of standard coal. Xinjiang's installed power capacity from new energy sources has surpassed 62 million kilowatts.

How much energy will Xinjiang have by 2025?

By 2025, Xinjiang's installed capacity of new energy is expected to exceed 116 million kW, accounting for more than half of Xinjiang's total installed capacity, which provides strong support for continuous energy structure optimization and high-quality economic development of the region.
