

European Solar and Energy Storage Solutions

Zambia green energy international limited

Overview

How can we help Zambia achieve a greener future?

We are taking our first steps to guarantee widespread electrification in Zambia while contributing to the country's energy transition. A constantly growing share of renewable energy is providing a decisive push to the energy transition while guiding the country towards a greener future. Would you like to work with us?

.

Why should Zambia invest in a power project?

This power project is expected to boost Zambia's energy capacity, which has been a critical issue in recent years, leading to power outages and supply interruptions in the country. The additional power supply will not only cater to the domestic demand but also enable Zambia to export surplus energy, which will enhance its foreign currency earnings.

How much does it cost to achieve Zambia's green growth ambitions?

It is estimated that achieving Zambia's green growth ambitions and Nationally Determined Contribution commitments under the Paris Agreement will cost over \$17 billion through 2030. At the same time, prudent fiscal management is crucial, given debt distress and macro-fiscal constraints.

How can Zambia achieve green growth goals?

Zambia should also strategically use climate funds and bilateral funding to support the investments needed to achieve green growth goals and enhance the enabling environment for attracting additional capital. Major opportunities also exist to maximize the value of Zambia's significant nature-based endowments through international carbon markets.

How can Zambia benefit from energy transition minerals & natural resources?

First, Zambia can leverage energy transition minerals and other natural resources for its development alongside strengthening its environmental legislation, institutions, and enforcement. Zambia has substantial untapped natural wealth with great value-addition prospects.

How can Zambia maximize environment-friendly economic growth?

In Zambia, we see two critical avenues to maximize environment-friendly economic growth. Zambia has vast natural resource endowments, and the environment—development tradeoffs can be balanced with sustained economic growth.

Zambia green energy international limited

Sustainable Energy Investment Opportunities in Zambia; ...

financing for green and sustainability-linked investments. Zambia's inaugural green bond issuance in 2023 has paved the way for innovative financing opportunities in the sector. These strategic initiatives lay a strong foundation for Zambia's transition to a sustainable and resilient energy future. As the country continues to build

Zambia's green growth opportunities: Balancing ...

While Zambia has significant renewable energy potential, an over-reliance on hydropower, dwindling water sources, and projected growth in mining and other industries could lead to increased emissions from fossil fuels.

Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

GEI Power

GEI Power is the first and only Zambian energy company that develops PV with cutting-edge battery storage, green hydrogen for electricity generation, and green ammonia production. It is also the first and only manufacturer and distributor of "Mbaula Ya Mphamvu", an innovative and affordable methanol-fuelled clean cookstove.

Home

Zambian energy company engaged in developing and investing in scalable and sustainable renewable energy projects in Zambia and the rest of sub-Saharan Africa, focusing on the generation, transmission and distribution of green hydrogen, solar and wind power.

About Us

GEI Power, founded in 2020, is a Zambian sustainable energy company that is focused on developing and investing in green hydrogen, mini-hydro, solar PV and wind power through generation, transmission, and distribution. With a project pipeline exceeding 100MW green hydrogen and 110MW battery energy storage integrated solar PV.

Zambia : Zesco signs \$3.5bn deal with China's CiEG for renewable energy ...

Zesco, Zambia's state-owned power utility company, has signed a Power Purchase Agreement (PPA) with Integrated Clean Energy Power Company Ltd (CiEG), a subsidiary of China Huadian Corporation

12.8V6Ah

- Nominal voltage (V):12.8
- Nominal capacity (Ah):6
- Rated energy (Wh):76.8
- Maximum charging voltage (V):14.6
- Maximum charging current (A):6
- Floating charge voltage (V):13.6-13.8
- Maximum continuous discharge current (A):10
- Maximum peak discharge current @10 seconds (A):20
- Maximum load power (W):100
- Discharge cut-off voltage (V):10.8
- Charging temperature (°C):0-+50
- Discharge temperature (°C):-20-+60
- Working humidity: <95% R.H (non condensing)
- Number of cycles (25 °C, 0.5c, 100%doD): >2000
- Cell combination mode: 32700-4s1p
- Terminal specification: T2 (6.3mm)
- Protection grade: IP65
- Overall dimension (mm):90*70*107mm
- Reference weight (kg):0.7
- Certification: un38.3/msds

Green Bond

13th January 2024, Lusaka - Zambia's debut Green Bond has been successfully listed on the Lusaka Securities Exchange (LuSE), marking a significant milestone achieved through CEC's subsidiary, CEC Renewables Ltd. This achievement is set to play a pivotal role in driving the development of renewable energy

within the country.

The Strength of Partnerships: Zambia's Renewable Energy Initiative

Zambia's Revised Updated NDC, submitted in 2021, targets emission reductions of 25% (equivalent to 20,000 Gg CO₂) by 2030 compared to a business-as-usual scenario, or 47% (equivalent to 38,000 Gg CO₂) with substantial international support. The project contributes to this target by reducing emissions from the forest and electricity sectors

Supporting women to lead Zambia's green energy and climate ...

Zambia is currently grappling with an energy crisis impacting economic growth and daily life across the nation. Recognising the untapped potential of women to drive change, the Graça Machel Trust launched the GMT Energy and Climate Action Network Summit in Lusaka to position women as leaders in addressing the country's energy challenges. According
