

## European Solar and Energy Storage Solutions

# Zhang Xingxu Solar Power Generation

## Overview

---

What is the role of solar photovoltaic power generation in China?

Among alternative sources, solar photovoltaic (PV) power generation is expected to play an important role in this process in China given abundant solar resources and huge PV manufacturing capacity ( 7 - 10 ).

Who are Dongxiao Zhang and Xu Zhu?

Dongxiao Zhang: conceptualization, methodology, supervision, writing - review and editing, funding acquisition. Xu Zhu: methodology, supervision, writing - review and editing. The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Should China develop wind and solar energy simultaneously?

The seasonal patterns show that China should develop wind and solar energy simultaneously, to exploit wind's highest potential during winter and early spring, and solar's higher production during late spring and summer.

Do dye-sensitized solar cells achieve high power-conversion efficiencies?

Here, we demonstrate a dye-sensitized solar cell (DSC) that achieves very high power-conversion efficiencies (PCEs) under ambient light conditions.

Are blue copper model complexes effective electron-transfer mediators in dye-sensitized solar cells?

Hattori, S., Wada, Y., Yanagida, S. & Fukuzumi, S. Blue copper model complexes with distorted tetragonal geometry acting as effective electron-transfer mediators in dye-sensitized solar cells. *J. Am. Chem. Soc.* 127, 9648-9654 (2005). Article [Google Scholar](#)

## Zhang Xingxu Solar Power Generation

---

### Harvesting Electricity from Water Evaporation through ...

When external pressure drives an electrolyte solution in a capillary tube with a charged inner surface, we obtain a streaming potential/current. This effect is also manifested when water ...

### Xing ZHANG , Professor, Director, Institute of ...

My research interests include: Thermophysical Properties of nanoscale materials, Heat transfer at micro and nano scales, Measurement technology at nanoscale, Hydrogen, Wind energy, etc. Meanwhile

### Micro-cable structured textile for simultaneously ...

The working principle of the hybrid power textile for electrical signal generation can be elucidated from two aspects, namely, the photovoltaic textile to generate power from absorbed solar

### A novel metric for evaluating hydro-wind-solar energy ...

Semantic Scholar extracted view of "A novel

metric for evaluating hydro-wind-solar energy complementarity" by Hang Xu et al. Establishing a wind-solar-hydro hybrid generation ...

### CNT-based water-induced generator for effective self-powered ...

Furthermore, the WIG system is capable of continuous power generation for ~ 3 h, attaining a tremendous total electric energy output of ~ 416.7 kJ m<sup>-2</sup> L<sup>-1</sup> (Fig. 4 d and ...

### ?Xiaoze Du?

?North China Electric Power University / Lanzhou University of Technology? - ??Cited by 15,006?? - ?heat transfer? - ?solar energy? - ?thermal energy storage? - ?energy conservation? - ?thermal power ...

### Deep learning based forecasting of photovoltaic power generation ...

High-precision forecasting of PVPG forms the basis of the production, transmission, and distribution of electricity, ensuring the stability and reliability of power systems. In this work, we ...

## Optimizing the operation and allocating the cost of shared energy

DOI: 10.1016/j.enconman.2024.118148 Corpus ID: 267537008; Optimizing the operation and allocating the cost of shared energy storage for multiple renewable energy stations in power ...

## Material and Device Design of Flexible Perovskite Solar ...

Material and Device Design of Flexible Perovskite Solar Cells for Next-Generation Power Supplies. Ruijia Tian, Ruijia Tian. Zhejiang Provincial Engineering Research Center of Energy Optoelectronic Materials and ...

## Xing ZHANG , Research Associate , Doctor of Philosophy

It shows stable and significantly improved PEC activity for hydrogen generation under visible light irradiation with a hydrogen production rate of about 19.1 mmol h<sup>(-1)</sup> (a Faradaic efficiency of

## Xing ZHANG , Professor, Director, Institute of Engineering

My research interests include: Thermophysical Properties of nanoscale materials, Heat transfer at micro and nano scales, Measurement technology at nanoscale, Hydrogen, Wind energy, etc. ...

## **Xinyu PAN , Researcher , Doctor of Engineering , Research profile**

A large-scale renewable photovoltaic-wind-concentrating solar power hybrid system integrating an electric heating device is proposed to provide a sustainable power for a domestic region.

## **Research on the MPPT Control Simulation of Wind and ...**

This article briefly analyzes the technical advantages of the wind-solar hybrid power generation system, builds models of wind power generation systems, photovoltaic systems, and storage ...

## **Micro-cable structured textile for simultaneously harvesting solar ...**

The working principle of the hybrid power textile for electrical signal generation can be elucidated from two aspects, namely, the photovoltaic textile to generate power from ...

## **Xing ZHANG , Research Associate , Doctor of ...**

It shows stable and significantly improved PEC activity for hydrogen generation under visible light irradiation with a hydrogen production rate of about 19.1 mmol h<sup>(-1)</sup> (a Faradaic efficiency of
